THE OPPORTUNITY

Beyond grades

Two law students can earn the same grade

for different reasons.

LexLearn begins by diagnosing the skill gap.

THE METHOD

Diagnose. Adapt. Practise.

Identify what the student can already do well.

Use that strength to develop a weaker skill.

Keep the learner independent and faculty in control.

FIVE DIAGNOSTIC SKILLS

A clearer learning profile

Recall | Understanding | Application

Legal precision | Exam answer structure

The public beta demonstrates part of this vision.

CURRENT STAGE

Working beta

AI analysis of written answers: in progress.

Learning impact not yet proven.

A live prototype with honest technical limitations.

QATAR-FIRST PROPOSAL

A supervised university pilot

Proposed scale: 30-60 students over 6-8 weeks.

Measure baseline, usability, scoring agreement

and early learning indicators under faculty oversight.

THE NEXT STEP

Proof before scale

Begin with Qatari law faculties.

Seek academic validation before expansion.
